

# GREEN TECHNOLOGY SOLUTIONS FOR THE BUILDING SECTOR

November 24, 2017 | 10 a.m. – 5 p.m. | Vienna, Austria

---

## How to foster smart resource usage and improve energy efficiency of buildings?

Information and networking event  
for the building and construction  
industry

---

Buildings are responsible for 40% of energy consumption and 36% of CO<sub>2</sub> emission in the EU. To achieve EU's ambitious CO<sub>2</sub> emissions reduction targets and energy performance of buildings, there is a need for new disruptive innovations in this sector, as well as for new business models, new partnerships between technology companies, building companies, researchers, and building owners, managers and developers.

**Are you a professional in this area and do you want to learn more about how to foster smart resource usage and improve energy efficiency of buildings?**

Come to join us at an information and networking event, where you can meet potential business and research partners from Austria, Slovakia and the Czech Republic involved in the green building technologies within the construction sector. We bring together the most relevant partners from the cross-border region of Vienna, Brno and Bratislava and beyond.

You can expect new, cross-sectoral and cross-border business opportunities, research partnerships, news about the latest trends. The networking format of 120 seconds Speed Dating gives you an opportunity to meet all the participants in a very efficient way.

### What topics are we interested in?

- Energy Efficient Buildings, Heating and Cooling
- Integration of Renewables in Buildings
- Eco-friendly Refurbishing and Upgrading
- Sustainable Water Solutions
- Management for the Connected Home

## Programme

10:00	Welcome
10:15	Keynote on technological trends of sustainable buildings – Ms Ursula Schneider (pos architekten)
10:45	120 Seconds Matchmaking
12:05	Lunch break
13:30	Presentations on:
<b>Funding</b>	H2020, Eureka, Eurostars – FFG
<b>Technology topics</b>	Water management in buildings – Mr Vondruška (ASIO) Alternative ways in energy management to achieve more environmentally friendly buildings, facade engineering, and green roofs – Ms Vera Enzi (Grünstattgrau.at)
15:30	Site Visit – OeAD – Guesthouse – a plus energy building

## Supported by:

## Keynote

**Ms Ursula Schneider** – CEO of pos architekten (Vienna) – a pioneer of sustainable architecture. Ms. Schneider has a profound expertise in Green Building Technology and will give a presentation on the latest technological trends related to sustainable buildings.

**Mr Antonín Vondruška** – an expert department manager from the Czech engineering company ASIO focused on air, water and wastewater treatment. Mr Vondruška is going to present solutions for water management in buildings.

**Ms Vera Enzi** – from European Federation of Green Roof and Wall Associations – Austrian Green Roof and Living Wall Association VfB, University of Life Sciences BOKU Vienna is going to talk about alternative ways to achieve more environmentally friendly buildings.

## 120 Seconds Matchmaking

This unique speed networking method allows participants to meet at round tables according to a predetermined schedule with almost all participants.

There are several round tables prepared each of them having assigned moderator who starts, supports and manages the discussion between participants.

Each representative has 120 seconds to present activities of his or her own company or research institution and areas for possible cooperation.

The participation is free of charge. The only condition of participation is the presentation of the company/institution (what it can offer and what it requests). Only one person per company is permitted.
